

Financial Cryptography and Data Security

Cozumel, Mexico

28-31 January 2008

<http://fc08.ifca.ai>

Overview

Financial Cryptography and Data Security is a major international forum for research, advanced development, education, exploration, and debate regarding information assurance in the context of finance and commerce. The conference covers all aspects of securing transactions and systems. Submissions focusing on both fundamental and applied real-world deployments are solicited. The goal of the conference is to bring security/cryptography researchers and practitioners together with economists, bankers, implementers, and policy-makers. Intimate and colorful by tradition, the FC program features invited talks, academic presentations, technical demonstrations, panel discussions as well as a research poster session.

Topics

Original papers, posters, surveys, and presentations on all aspects of financial and commerce security are invited. Submissions must have bearing on financial and commerce security issues, but can be inter-disciplinary in nature and need not be exclusively concerned with cryptography. Topics of interest include:

Anonymity and Privacy
Auctions and Audits
Authentication and Identification
Biometrics
Certification and Authorization
Commercial Cryptographic Applications
Transactions and Contracts
Digital Cash and Payment Systems
Digital Incentive and Loyalty Systems
